# positive about motorsport

**For organisers and events such as the Visit Conwy Cambrian Rally, there is an increasing need to act on mitigating the associated environmental impacts such as the carbon footprint generated by its running. Such action is necessary to ensure the continued support of our stakeholders and the communities our event relies on. Several events have begun to take such steps to help to make motorsport and the environment more sustainable for the future.**

The Visit Conwy Cambrian Rally has decided as part of an environmental road map, to partner with Carbon Positive Motorsport, and to take significant steps to mitigate its carbon footprint through the purchase of carbon reduction units (CRUs)

These CRUs are sourced using only world class UK rewilding-based carbon offsetting projects certified by the Woodland Carbon Code. Such projects provide greater environmental benefits than offsetting alone and ensure that the economic benefits are retained in the UK. The CRUs will provide assured carbon offsetting in the future, to the equivalent of an estimated CO<sub>2</sub>e level, using UK government carbon conversion factors that correspond to the forecasted fuel consumption of the organisers and competitors vehicles on the event day.

This forecast is based on a proprietary database of actual competition and organisers vehicles fuel consumption, and will include an additional 25% offset level, to create a carbon positive level of offsetting in the long term.

Following the event, the estimated tCO<sub>2</sub>e equivalent, will be registered as Pending Issuance Units (PIUs) which provide the CRUs. This transaction will be administered by Carbon Positive Motorsport, through its partner Highland Carbon in the name of the Visit Conwy Cambrian Rally 2023 and published via IHS Markits on the UK land registry. This registration provides verification and traceability of the CRUs and prevents any reselling of such units. Details of the projects used can be found on the carbon positive motorsport website.

We have included a discounted £16 carbon offsetting charge per competitor within our entry fees and consider this as a relatively low cost for the quality of offsetting provided, and to secure the benefits for the event in the future. Competitors can select to opt out of this charge if wished through the event organisers.

We appreciate the involvement of all competitors in supporting this initiative.
